

THE EXPERT CLEAR ALIGNER RESIDENCY

Where Aligners Become Predictable - And You Stay in Control

A Two-Day Premium Residency for 100+ Case Clinicians

For orthodontists and experienced general practitioners

Switzerland • Limited to 12 participants • Intensive hands-on format

Clear aligners have become a dominant orthodontic modality - yet most of the profession still struggles with predictability, force control, staging logic and understanding what aligner systems *actually* can and cannot do.

The Expert Clear Aligner Residency is designed for clinicians who already perform high volumes of orthodontic or aligner treatments and want to elevate their results, reduce refinements, and gain complete control of aligner biomechanics and treatment planning.

This is not a typical aligner course.

It is an advanced, clinically driven, interactive residency that blends deep orthodontic biomechanics, system-neutral aligner mastery and real-world execution strategies.

WHO THIS RESIDENCY IS FOR

- **Orthodontists**
- Highly specialised GP's performing **100+ aligner/ortho cases per year**
- Clinicians who want to transition from "software operator" to **true aligner expert**
- Providers who want predictable outcomes, fewer refinements and stronger diagnosis-driven planning
- Clinicians who want a concrete system for generating **consistent ortho case flow**

Not suitable for beginners

WHAT YOU WILL MASTER

1. Predictability & Refinement Reduction

- Reduce refinements by **up to 50%**
- Build realistic, force-driven treatment plans
- Understand movement limits and predictability across multiple systems
- Create staging sequences that *work in the mouth* — *not just in the software*

2. Deep Clear Aligner Biomechanics

- Force vectors, control points and anchorage strategies
- Root movement vs crown movement
- Intrusion, extrusion, rotations and torque — aligner-specific mechanics
- Why aligners fail — and how to prevent it

3. Virtual Setup Mastery

- System-neutral training across: ClearCorrect, Invisalign, Spark, Clarity and others
- "Behind-the-scenes" software logic and algorithmic behaviour
- Troubleshooting and technician communication
- Recognizing unrealistic movements before production
- Designing setups that translate reliably to the patient

4. Live Case Planning

Experience world-class, real-time treatment planning with Dr. Helle Hatt - one of the only clinicians globally capable of performing advanced multi-system live case planning with absolute clarity, precision and pedagogical simplicity.

5. Hands-On With Your Own Cases

Each participant brings a selection of their own cases (Class I, II, III, vertical issues, asymmetries, etc.).

Working in small groups, you refine your own plans under expert guidance - and present them in a collaborative, high-level learning environment that accelerates your mastery.

6. The Referral Network System: Your Next 100 Cases

You will leave with a complete, plug-and-play system to generate a stable stream of aligner/ortho cases:

- Referral event templates
- Invitation scripts
- Communication guidelines
- Retention strategies for referrers
- A step-by-step plan for building your next **100/year cases**
- Follow-up systems that maintain momentum

This is not theory - **it is a proven, actionable system used by clinics across Europe.**

PROGRAM STRUCTURE

Two Intense Days — Plus Three Months of Follow-Up Support

Day 1:

- Foundations of aligner biomechanics
- System logic and limitations
- Clinical case review
- Virtual setup optimisation
- Interactive exercises
- Hands-on planning session I
- Evening residency dinner (included)

Day 2:

- Advanced biomechanics
- Staging strategies and anchorage finesse
- Live case planning by Dr. Helle Hatt
- Hands-on planning session II
- Referral network system
- Implementation roadmap
- Residency certificate presentation

Follow-Up (3 Months):

- 1× monthly online session
- Case reviews
- Personalised execution plans
- Accountability and growth tracking

YOUR FACULTY

Dr. Helle Hatt

Clear Aligner Specialist in Orthodontic Biomechanics & Multi-System Treatment Planning

Helle has previously taught orthodontists at the **University of Copenhagen, Aarhus University, and the University of Geneva**, and today she guides dentists and orthodontists worldwide in advanced clear-aligner biomechanics, staging strategies and complex case planning.

She is one of very few clinicians globally who combines:

- Deep orthodontic biomechanics from years of academic teaching
- Mastery of multiple aligner systems (not just one brand)
- Behind-the-scenes insight into software logic, staging algorithms and technician workflows
- **20,000+ reviewed treatment plans across major aligner platforms**
- A unique ability to explain complex concepts simply and clinically

Helle understands aligners through the lens of orthodontics - making her guidance precise, realistic and directly applicable to specialist-level planning.

Dr. Jesper Hatt

Dentist, Clinical Educator & Referral Strategy Specialist

Jesper has spent the past decade helping dental and orthodontic clinics across Europe strengthen treatment communication, streamline workflows and build predictable patient flow through structured referral systems.

He combines:

- Practical clinical experience with insight into how orthodontic practices grow
- A clear understanding of how referrers think and choose whom to send patients to
- Proven methods for opening and maintaining strong referrer relationships
- A structured, step-by-step approach to referral events that generate new cases
- An ability to translate strategy into simple, actionable steps for busy clinics

Jesper helps convert advanced clinical mastery into real case flow - ensuring that skills learned in the residency lead to stronger referrer engagement, increased patient referrals and long-term orthodontic growth.

LOCATION & FORMAT

- Switzerland - Basel
- Maximum 12 participants
- Premium venue and learning environment
- Residency dinner included
- Optional visit to Straumann HQ (Basel cohorts)

👉 [Register online here](#)

FEE

€3,850 per participant

Includes all teaching, materials, templates, dinner, and 3-month follow-up support.

READY TO TAKE CONTROL OF YOUR ALIGNER TREATMENTS?

For orthodontists and advanced clinicians who want predictable results, deeper mastery and a stronger ortho practice - this residency delivers a decisive competitive advantage.

Limited to 12 participants.
